Dear Resident

Ongoing Installation of electricity Ducts / Cables on Chapel Road until 7th December 2026

In partnership with our contractor, Novus Power, we are installing underground electricity cables from a solar farm nearby towards Indian Queens Power Substation.

Following traffic safety issues due to width restrictions identified by ourselves and the Local Authority it has been decided that the works are to continue using short Road Closures along Chapel Road instead of the originally planned Traffic lights.

Overleaf are a proposed outline program of works and a diagram showing section by section closures. We will also maintain access to Private driveways along the route liaising closely with residents as we pass through the village.

We are also closely liaising with local authorities and the bus companies to maintain service where possible.

Our work should have no impact on your electricity supply. The project involves excavating short trenches to lay pipework (ducts) and pulling through new underground cables.

There will be some noise from the digging activities during these works, and you will see members of our teams working in the public highway behind safety barriers.

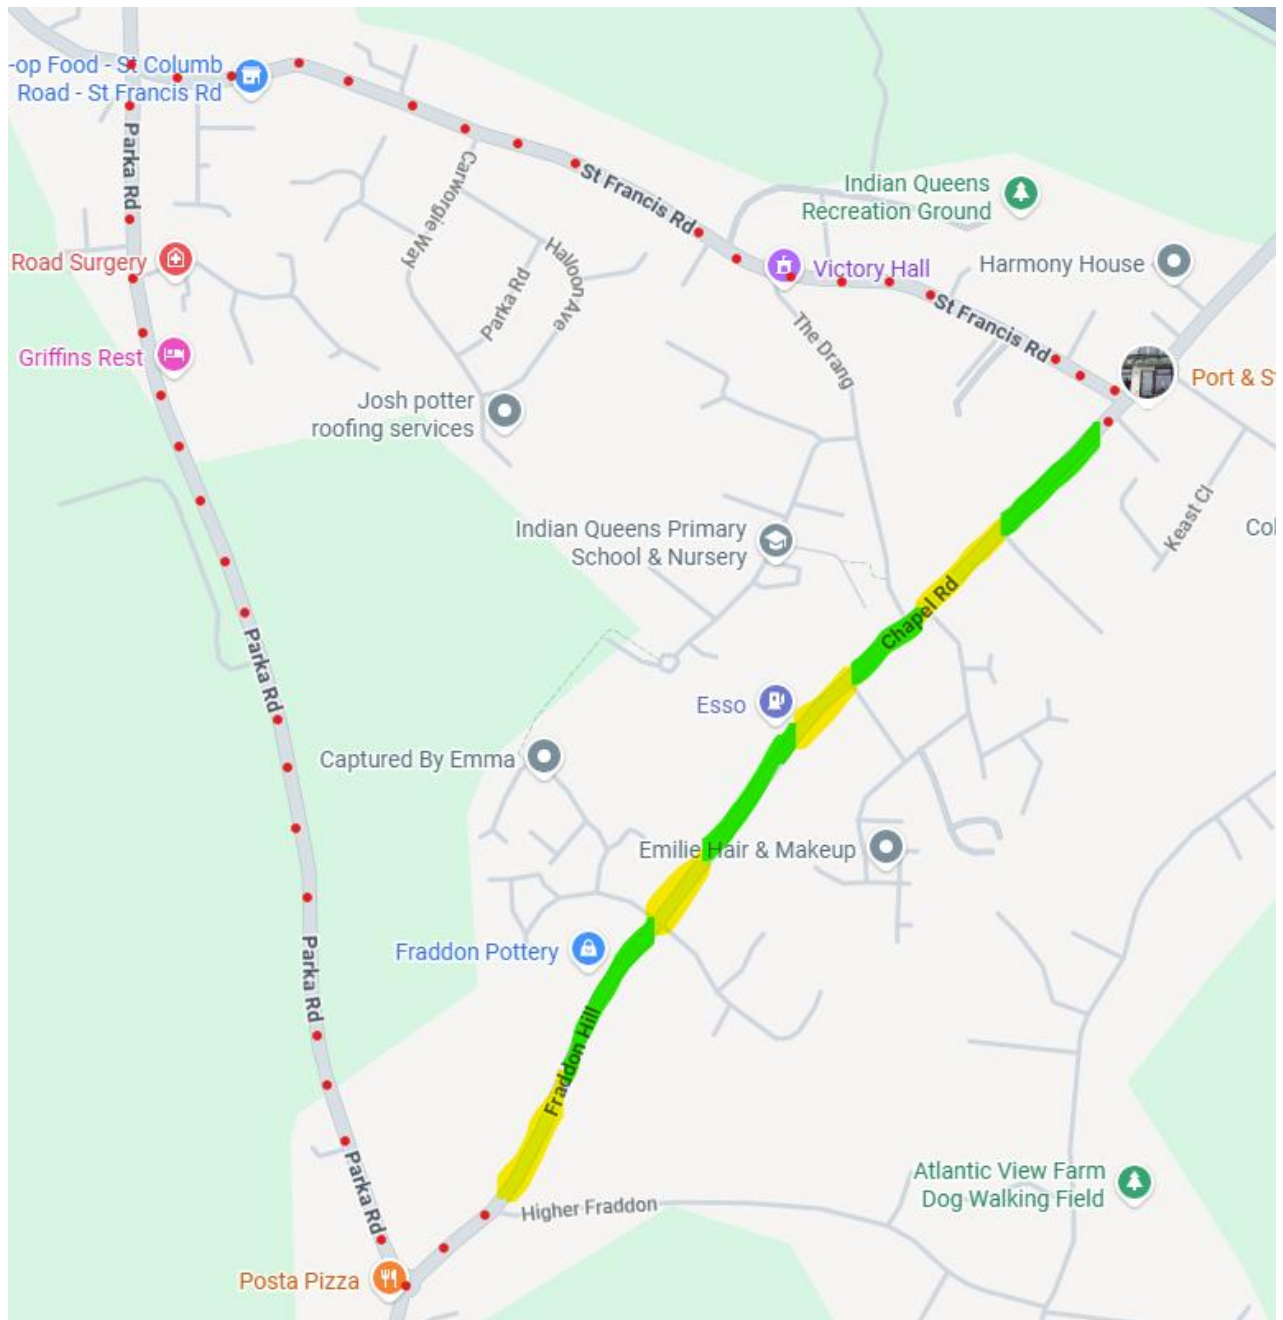

Access to all affected properties along the route will continue to be maintained at all times where possible. For local refuse collection services, there will be no changes to collection days and access for these vehicles will be permitted throughout the work. For access to garages & drives, please notify a member of the site team if you require support with this.

We have worked closely with the local authority in planning this project to minimise disruption to the local community wherever possible and apologise for any inconvenience caused previously and during the changes and will make every effort to minimise the impact on your neighbourhood. If you have any questions, [please contact our office on 01223-423-918](tel:01223-423-918) or email info@ground-utilities.co.uk

Yours sincerely

Construction Team

Planned sections

Diversion Route will be via St Francis Road, and Parka Road either side of the closed section moving through Indian Queens.
